ONLY / TS 2017

Sharka Bosakova's transseasonal collection ONLY / TS 2017 was showcased at the Fashion Live Festival Bratislava in Slovakia. The collection is based on the theme of Body Construction and 3D technology. Together with the highly functional 3D jewellery set 'ONLY' are seeking abstraction of shapes and thoughts. Form follows function … simply getting to the ONLY .. from where new possibilities present themselves.
BODY CONSTRUCTION

Sharka Bosakova / Czech Fashion Council / Makers Lab - 3D accessories

"Kořeny - Roots" is an exploratory journey into the depths of the body, inner structures brought to the surface through 3D printed objects and jewellery.

Each piece arriving fully formed and revealing it's delicate layers of 3D printing technology simulating and extracting anatomical structures.

3D Fillament - Polylactic Acid (PLA) is derived from renewable resources like corn starch or sugar cane. Polylactic Acid is biodegradable and become liquid at its melting point (150-160 degrees Celsius).

FASHION LIVE BRATISLAVA - ONLY / TS 17

“Form follows function ... simply getting to the ONLY...from where new possibilities present themselves.”

The entire project is divided into four days of fashion shows, sales and showrooms, presents the best of Slovakian and Czech fashion scene, foreign brands, VIP socials and cultural events.

ROOTS - magnetic accessories

The multifunctional jewellery set is convertible, as each piece can be attached or juxtaposed with another, via the built-in magnets. You can create your own vision / construction / structure. With a multitude of shapes and colour combinations, your earrings can become a brooch or necklace simply by attaching, detaching or rearranging the different components.
